Sheet A · Pip's core geometry

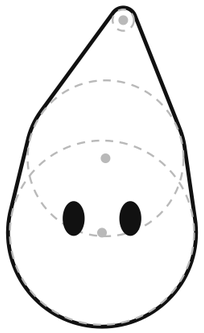

Circles, lines and curves. As few as you can. Grey = the circles underneath, black = the outline.

One circle + a point

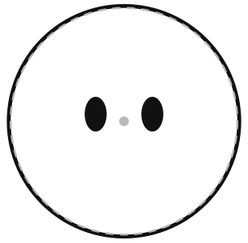

2 circles

Three circles: blobby

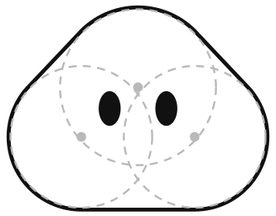

3 circles

Just a circle

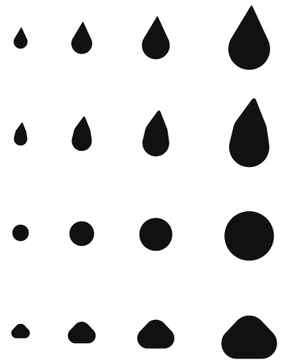

1 circle

Squish: three circles

3 circles

Tiny check: 16 · 24 · 32 · 48 px

Your Pip: start from one circle

Add a point, a second circle, or nothing at all.

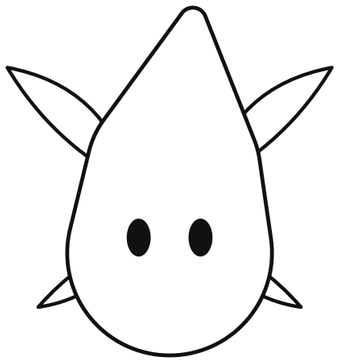

Push and pull

Ghosts to stretch, squash, lean or tip over.

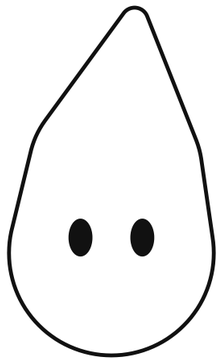

Sheet B · Wings and movement

Wings as an ability, not part of the body. Same Pip, two ways to get about.

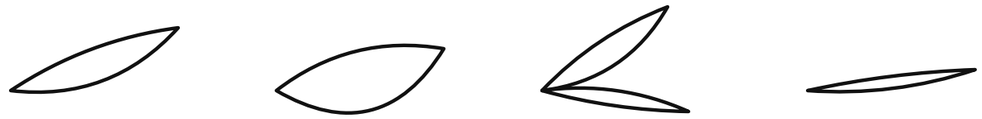

With wings: flies, flutters, follows

Without: blobs about

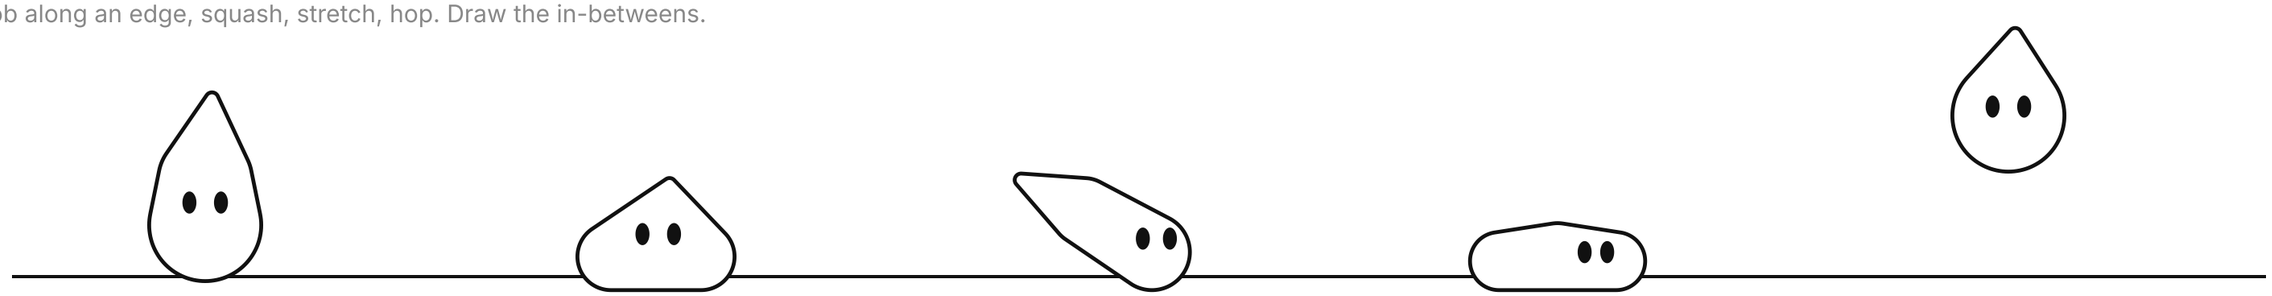

Wing shapes: one curve each side

Leaf · round · two-pair (the fairy) · slim

Wingless moves

Blob along an edge, squash, stretch, hop. Draw the in-betweens.

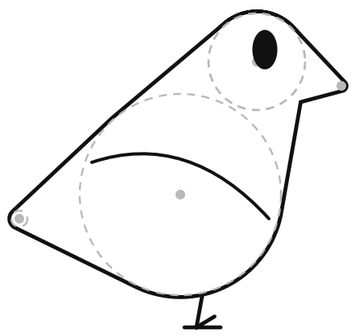

Draw Pip flying

Draw Pip getting about without wings

Sheet C · Pigeon morph

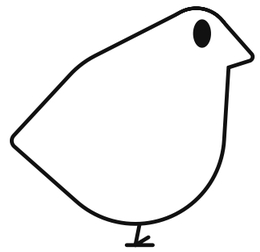

Chunky, round, one leg at least. Body circle, head circle, a beak point, a tail point.

How it is built

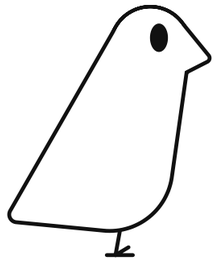

4 circles

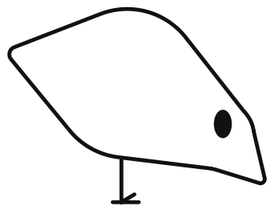

Round

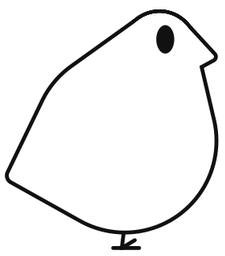

Tall

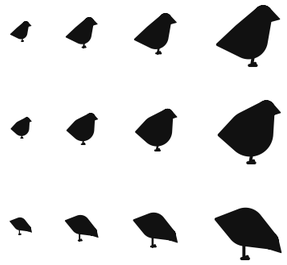

Pecking

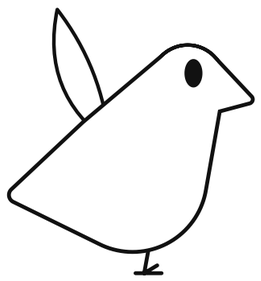

Puffed up

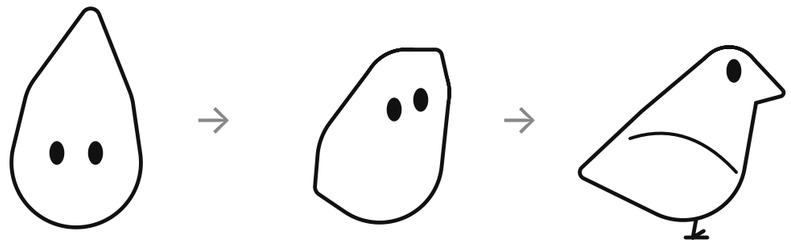

Tiny check: 16 · 24 · 32 · 48 px

Wing out

Pip → pigeon

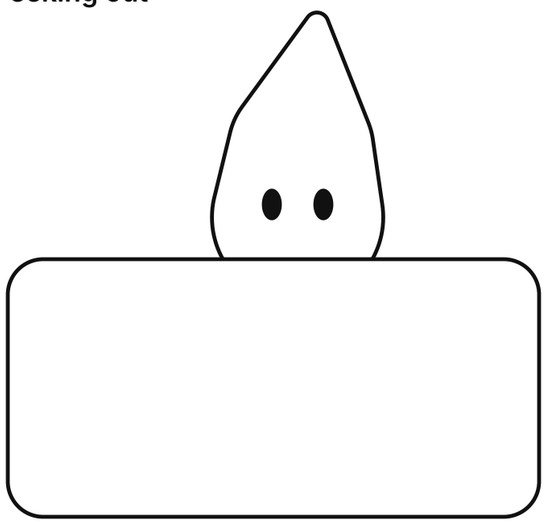

Your pigeon

Body, head, beak, tail, a leg. Then shrink it: does it still read at 16 px?

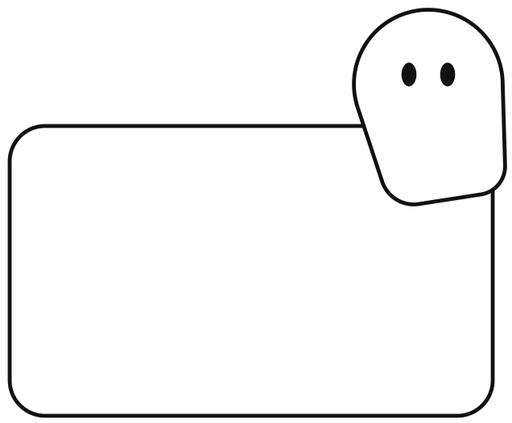

Sheet D · Living in the interface

Panels are the world. Pip peeks, clips on, stretches and squeezes. Panels are drawn over Pip.

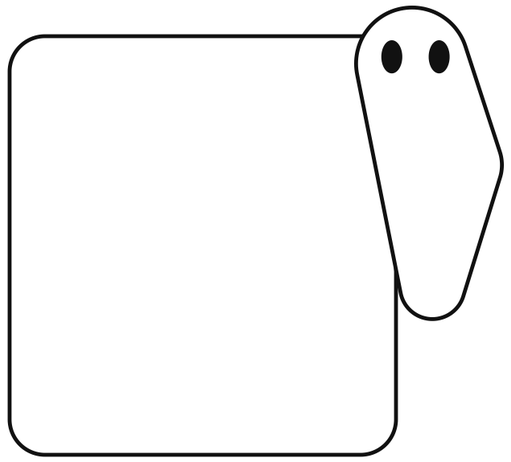

Peeking out

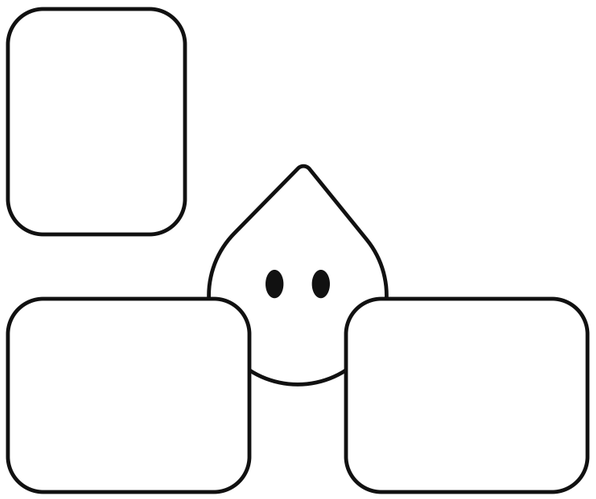

Clipped on

Stretching round an edge

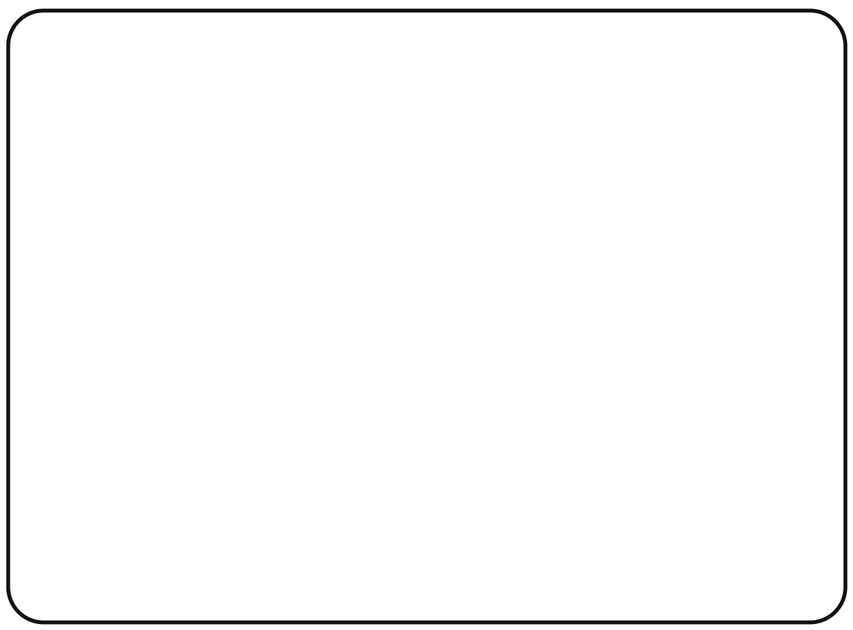

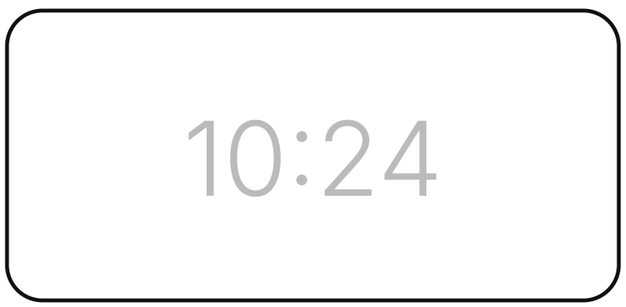

Squeezed in

Your turn: where does Pip live in here?

Two empty panels and a clock. Draw Pip anywhere: behind, on top, in between.

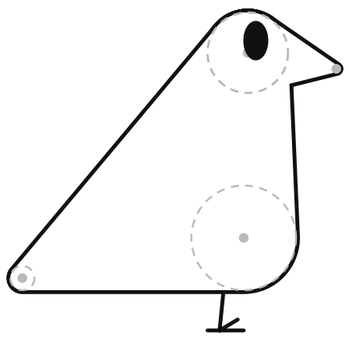

Sheet E · Aaron's wedge pigeon

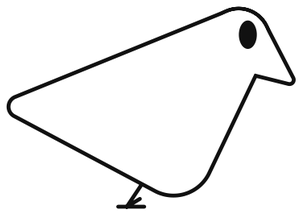

Your shape from the Morph Workshop: one long sloped back, a round belly, head up top. Four circles and a leg.

How it is built

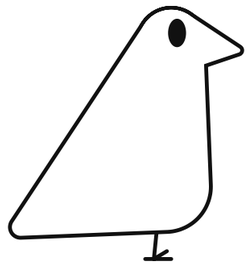

4 circles

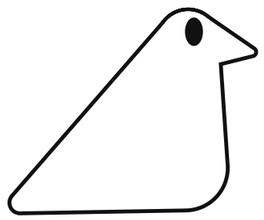

Pecking

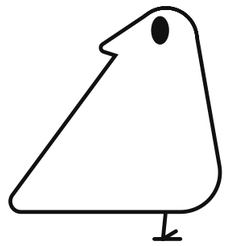

Proud

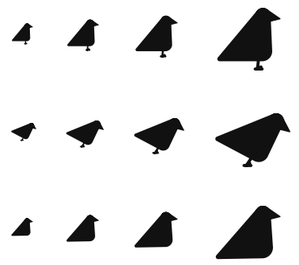

Sitting (no leg)

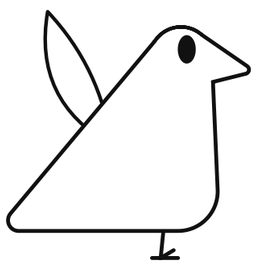

Looking back

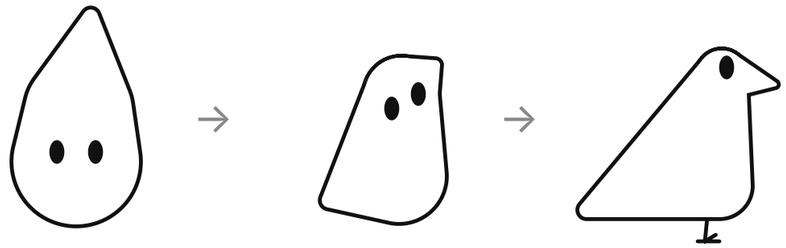

Tiny check: 16 · 24 · 32 · 48 px

Wing out

Pip → wedge pigeon

Your wedge pigeon, your way

Push the tail further, round the belly, try a second leg. Then shrink it: does it read at 16 px?
